

Tire Supplier Technical Lead*

With our innovative spirit and over 50 years of expertise, we are forging ahead in Vehicle Engineering of product developments for the automotive sector. For successful developments in the future, we put our stakes on your know-how.

This will make you grow:

- Act as the primary technical interface between the OEM and tire suppliers;
- Ensure full alignment between vehicle requirements and supplier technologies;
- Translate performance targets (handling, comfort, NVH, durability, efficiency, safety) into clear and measurable tire technical specifications;
- Coordinate joint tire–vehicle development activities, ensuring compliance with project milestones;
- Evaluate supplier technical proposals and assess their consistency with performance objectives and design constraints;
- Plan and supervise both indoor and outdoor testing, including characterization tests, track testing and validation activities on special surfaces or under extreme environmental conditions;
- Analyze test data and technical reports, identifying corrective actions and optimization opportunities;
- Support Purchasing during supplier selection and technical evaluation phases;
- Monitor supplier technology roadmaps and industry trends to contribute to product innovation;
- Ensure proper technical documentation and traceability of decisions throughout the development process.

And this is how you'll take us forward:

- Bachelor's degree in Mechanical Engineering, Automotive Engineering, Aerospace Engineering or related fields **or** Technical high school diploma (Mechanical Technician) with significant experience in motorsport or tire development;
- 3 - 5 years of experience in in tire development, vehicle testing, or technical supplier management
- Solid knowledge of vehicle dynamics and tire behavior;
- Ability to analyze data (telemetry, test reports, tire structural parameters);
- Familiarity with automotive development processes and milestone management;

- Knowledge of track testing methodologies and validation protocols;
- Excellent knowledge of Italian and English, both written and spoken;
- Team player with strong attention to detail and problem-solving attitude.

* Gender, age, nationality, or religion are not relevant for us – you are all that matters.

Sounds like your next challenge? Then we'll be looking forward to your application!
