

## .NET Desktop client Developer\*

High competence and the passion for new challenges make our Electrics/Electronics division the guidepost to the industrial future. Take your next step and support our team.

This will make you grow:

- Develop new features respecting deadlines
- Accurately test what has been developed
- Support the team during the analysis phases
- Give new ideas on how to improve the actual Applications
- Document what has been developed

And this is how you'll take us forward:

- Proven experience as desktop\client developer:
  - C# .NET development
  - SOAP/Rest API consume
  - writing accurate tests
- Experience with GIT
- TCP/IP and related protocols knowledge
- Able to produce quality work with strict deadlines

Nice to have:

- Experience with security best practices
- Experience with Azure DevOps
- Knowledge of automotive standards and protocols (e.g. CAN UDS, CAN DoIP, ISO 22900, ISO 15765, ISO 21434, SAE J1939 etc.).

\* Gender, age, nationality, or religion are not relevant for us – you are all that matters.

Sounds like your next challenge? Then we'll be looking forward to your application!
