

## Aeromotive Mechanical Designer

---

As a leader in innovation, EDAG aeromotive is shaping the future of aerospace technology. You can join us in developing the future aerospace technologies and contribute to our team.

This will make you grow:

- 3D modeling and 2D drafting using CATIA V5 for aerospace components.
- Design and integration of parts and assemblies related to Interior Cabin, ECS, and Secondary Structure.
- Collaboration with structural, systems, and manufacturing teams to ensure proper component integration.
- Analysis of technical requirements and support in defining specifications.
- Preparation of technical documentation and deliverables required for certification (e.g., Bill of Materials, technical drawings, reports).
- Configuration change management and support for technical review activities

And this is how you'll take us forward:

- Master's Degree in Mechanical/Aeronautical/Aerospace Engineering;
- 1–3 years of experience in mechanical design
- Strong proficiency with CATIA V5
- Basic understanding of aerospace design standards and processes
- Excellent knowledge of Italian and English, both written and spoken;
- Team player with strong attention to detail and problem-solving attitude

Sounds like your next challenge? Then we'll be looking forward to your application!
