Aerospace software testing engineer*

High competence and the passion for new challenges make our Electrics/Electronics division the guidepost to the aerospace future. Take your next step and support our team.

This will make you grow:

- Writing unit tests or software integration tests;
- Writing test procedures;
- V&V process, Agile.

And this is how you'll take us forward:

- Experience in the complete management of software validation and verification (V&V) activities;
- Experience in writing unit and integration tests;
- Experience in writing test cases;
- Knowledge of the MIL-STD-498 standard, and the consequent STP, STD, STR documentation;
- Mastery of at least one of the following programming languages: C++, Java and Python.

* Gender, age, nationality, or religion are not relevant for us – you are all that matters.

Sounds like your next challenge? Then we'll be looking forward to your application!
