

Whole Vehicle Homologation Engineer*

High competence and the passion for new challenges make our Electrics/Electronics division the guidepost to the automotive future. Take your next step and support our team.

This will make you grow:

- End-to-end management of vehicle type approval processes (EU and international markets)
- Analysis and interpretation of applicable regulations (UNECE, EU Regulations, FMVSS, CCC, etc.)
- Preparation, review, and management of type approval documentation (information package, CoC, technical data sheets, declarations of conformity)
- Coordination with approval bodies, competent authorities, and technical services
- Interface with internal departments (Engineering, Quality, Legal, Manufacturing) to ensure vehicle regulatory compliance
- Support type approval updates, extensions, and variations throughout the vehicle lifecycle
- Monitoring of regulatory developments and assessment of their impact on products
- Contribution to the definition and continuous improvement of internal compliance and regulatory governance processes

And this is how you'll take us forward:

- Degree in Engineering (Mechanical, Vehicle, Electrical, Industrial, or equivalent)
- 3–5+ years of senior experience in automotive type approval or regulatory affairs
- Strong knowledge of vehicle homologation processes and related documentation
- Proven experience managing multi-market regulations (EU and non-EU)
- Ability to operate effectively in complex OEM environments and engage with internal and external stakeholders
- Structured, process-oriented mindset with strong attention to documentation quality
- Excellent proficiency in English, both written and spoken

* Gender, age, nationality, or religion are not relevant for us – you are all that matters.

Sounds like your next challenge? Then we'll be looking forward to your application!
