Defence Radar System Engineer*

Who we are: Working together, growing together, creating new things together: EDAG connects people and the future. Company and workforce share the same vision. You'll go your own way in your career at a high level, nationally or internationally.

Take your next step and support our team.

We are looking for a **Radar System Engineer** for an important project in the Defense and Security sector (site Rome)

Activities:

You will be mainly involved in:

- Modeling of processing and management algorithms for defense systems (radar signal processing and radar data processing).
- Simulations to obtain the performance of processing and management architectures for defense radar systems.
- Data analysis and performance evaluation from recorded radar data.

And this is how you'll take us forward:

- You have a Bachelor's or master's degree in Electronics, Telecommunications or similar.
- You have at least 3 years of experience in the role of Radar System Engineer.
- You have good knowledge of Matlab and Simulink.
- English working proficiency.

* Gender, age, nationality, or religion ae not relevant for us – you are all that matters.
